- Did you know that you can test your well water for free? And that funding is available to help maintain your well?
- Did you know some pollutants in your water are odorless, tasteless and will not be removed by boiling?
- Did you know that the #1 responsibility of a private well owner is to test their well water quality once per year?

IF you're interested in these questions, join us for a one-hour information session on how to make sure your private well is keeping you and your family safe.
