Remodeling Project Underway at the Library:

The small computer room is being remodeled to provide an area for local history and genealogy digitization and preservation. The room will have the computer stations removed. It will then be repainted, and new carpet and LED lighting will be installed.

Equipment will be purchased for the digitization of photographs and documents. These will be used to create a digital database that will eventually be available online, providing a photographic history of Sumner and the surrounding counties. This part of the project will take time to accomplish as volunteers will be needed and training will be necessary to ensure the images are digitized properly.

Contact the Library if you are interested in volunteering for this project in the future.
